

TOP 10 BENEFITS OF HYDRONICS FOR HOMEOWNERS

EFFICIENT

Every home is different but homeowners with hydronic heating systems often see energy savings of 20% or more.

RELIABLE

Hydronic heating system equipment and components are designed for years of service life and require little maintenance and cleaning.

CLEAN

Hydronics provides dust and allergen free heating for better indoor air quality.

SAFE

All heating equipment and components are approved to Canadian safety standards and heating units are only warm to the touch.

QUIET

Enjoy warmth and comfort without hearing your heating system cycle on and off.

UNSEEN

Hydronic heating systems can be built into floors, ceilings and walls, allowing you to maximize living space.

VERSATILE

Heat your entire home or favourite room. Melt the snow on your driveway. Hide the system or show off your stylish radiators. You have more heating options with hydronic heating.

CUSTOMIZABLE

Use zoning and get the heat you want, when and where you want it. Why heat up the whole house just to be comfortable in the living room?

COMFORTABLE

Experience even heat throughout your entire home – eliminate those cold and hot spots.

COOLING

Use the same technology to cool your home or select separate cooling units or system.
